Career Objective

M.Tech student specializing in **Artificial Intelligence and Machine Learning** with strong experience in **Data Analytics, Python-based data analysis, ETL workflows, BI dashboards, and machine learning**. Seeking opportunities in **Data Analytics / Data Science** to apply analytical thinking, automate data pipelines, build interactive dashboards, and generate actionable business insights using modern data tools.

Education

Vellore Institute of Technology (VIT), Chennai 2025 – Present
M.Tech – Artificial Intelligence and Machine Learning

Sant Longowal Institute of Engineering & Technology (SLIET), Punjab 2021 – 2024
B.E – Computer Science Engineering **80.2%**

Sant Longowal Institute of Engineering & Technology (SLIET), Punjab 2018 – 2021
Diploma – Computer Science Engineering **83.7%**

Technical Skills

Programming Languages: Python, Java, C, C++, SQL
Data Analytics & ETL: Data Cleaning, Data Transformation, ETL Pipelines, Exploratory Data Analysis (EDA), KPI Analysis, Data Modeling
BI Tools & Visualization: Power BI, Advanced Excel, Dashboard Development, Data Visualization, Business Reporting
Data Science & Machine Learning: Regression, Classification, Model Evaluation, Feature Engineering, AI/ML Model Development
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Scikit-learn, TensorFlow, PyTorch
Tools & Platforms: Jupyter Notebook, Git, Docker, Kubernetes, Streamlit
Core Concepts: DBMS, OOP, Data Structures & Algorithms, Operating Systems, SDLC, Analytical Thinking

Projects

Credit Risk Prediction Model *Python, SQL, Scikit-learn, Streamlit*
- Built a machine learning model to predict borrower default probability using financial and demographic data.
- Performed **data preprocessing, feature engineering, and ETL workflows** using Python.
- Developed a **risk scoring system** classifying customers into Poor, Average, Good, and Excellent risk categories.
- Created a **Streamlit dashboard** for automated loan evaluation and decision support.

Supply Chain Financial Analytics Dashboard *SQL, Power BI, Excel*
- Designed SQL-based analytics pipelines to extract and transform supply chain financial data.
- Built interactive **Power BI dashboards** for KPI monitoring, demand analysis, and financial performance tracking.
- Automated reporting workflows using SQL queries, stored procedures, and BI visualization tools.

Autonomous AI Employee Onboarding Agent *Python, AI, APIs*
- Developed an AI-based automation system to streamline employee onboarding workflows.
- Integrated APIs and automated document processing to reduce manual HR workload.
- Improved efficiency through workflow automation and AI-based task management.

Achievements

- GATE Qualified – Computer Science Engineering (2025)
- Solved **200+** Data Structures and Algorithms problems across coding platforms
- HackerRank Gold Badge in **C++** and Silver Badge in **Python**

Soft Skills

Analytical Thinking • Attention to Detail • Communication • Teamwork • Problem Solving • Curiosity to Learn
